Welcome bizStrap ONE

bizStrap ONE is a one-page (or optionally, multi-page) HTML5/CSS3 Website Template with professional design and layout for building business or information-oriented websites. Also, included in the bizStrap ONE theme is a complete library of info graphic elements.

The bizStrap ONE template is built on the Twitter Bootstrap framework and is fully responsive so that it looks great all devices. The Bootstrap Framework also offers quite a bit of flexibility and extensibility to web developers. Details and documentation about the Twitter Bootstrap Framework can be obtained here: <http://getbootstrap.com/2.3.2/>.

The primary bizStrap ONE website template contains the following thirteen (13) compartmentalized website content areas:

- **Optional Notification Bar**
- **Phone Number & Social Media Contact Bar** – a bar for displaying your phone number along with social media icons that you link to your social media profiles.
- **Logo and Navigation Menu Header** – contains your organization's logo and your website navigation menus and links.
- **Slider** – graphical presentation of you practice team members, legal services, accomplishments or anything you want to convey to website visitors in a slide.
- **Call To Action Bar** – used to display awards, accolades, and/or associations and affiliation icons or logos.
- **Info Graphics Band**– Quick welcome and introduction to your firm.
- **Portfolio** -
- **Team Members** – content area to showcase your firm primary and secondary areas of practice.
- **Blog Post Summary** – comprehensive bio profile and professional showcase for each attorney. Let's face it, your clients are buying you, and BIZSTRAP ONE gives you a highly effective means to convey talents, experience and professional recognition.
- **About Us** – an area to showcase or highlight results you've achieved.
- **Contact Us** – general legal question and answers.
- **Integrated Map**
- **Footer**

Areas of the website that you don't need, want or simply don't have to time to prepare can be easily removed; or temporarily hidden from view until you are ready to populate the area with appropriate content.

Populating the BIZSTRAP ONE Template

Each section or area of the bizStrap ONE Template is compartmentalized into sections that can be easily edited, hidden or removed. Each section is commented at the beginning with `<!-- begin {section name} -->` and at its end with `<!-- /end {section name} -->` so that you may find and edit each section quickly and easily with your own content.

TIP: To hide section of the website:

`<!-- Hide the code block`

`{html markup here...}`

`-->`

Header Section

The bizStrap ONE header section contains an optional notification bar; phone number and social media bar; header logo and navigation menus.

You can quickly locate the header section from the starting and ending comment tags below:

`<!-- start header -->`

`<!-- /end start header -->`

Editing the Notification Bar

The entire notification bar's markup is enclosed within the following tags:

`<!-- start notification bar -->`

<!-- /end notification bar-->

Thus, if you don't wish to show the notification bar simply comment out the entire area between the starting and ending comments.

To enter your own special notification message simply locate the comments below and enter your notification message.

<!-- enter notification message here -->

Editing the Phone Number and Social Media Contact Bar

The Phone Number and Social Media Contact Bar can be quickly located between the comments below>

<!-- start top grey bar -->

<!-- /end start top grey bar -->

To edit the social media icons and links simply locate the comment below:

<!-- edit social icons here -->

To edit the phone number simply located the comment below:

<!-- edit phone number here -->

Editing the Logo and Navigation Menu Header

To insert your organization's logo and modify the navigation menus locate the

<!-- your logo goes here -->

<!-- navigation menus here -->

Slider Section

The slider used by bizStrap ONE is the popular premium slider component, **Slider Revolution**.

We've made it easy to edit/modify the slides and captions used in our sample content by commenting each section of each slide. The slide section can easily be located by the beginning and end tags below.

<!-- slider start -->

<!-- /end slider -->

Sections of each slide within the sample slider are broken down by the slide #, the main slide image, the slides captions, and layered images. Is section is commented as follows:

```
<!-- slide 1 -->
```

```
<!-- slide 1 main image -->
```

```
<!-- slide 1 caption 1 -->
```

```
<!-- slide 1 caption 2 -->
```

```
<!-- slide layer image -->
```

For more details about Revolution Slider we included the product documentation from the developer at the end of this document.

Call to Action Bar

To edit the call to action bar simply locate the comments below>

```
<!-- call to action bar -->
```

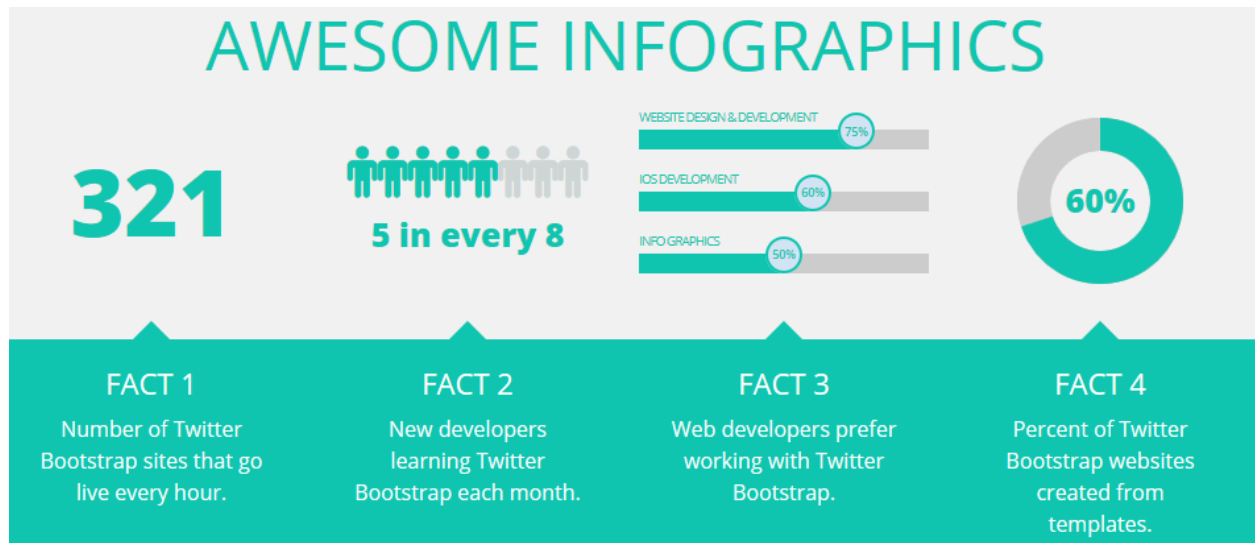

Info Graphics Bar

The info graphics bar is comprised of four columns, and by default, shows the large number, contrasting icons, progress bars, and pie chart. The info graphics bar is contain between the tags shown below.

```
<!-- start infogrphics bar -->
```

<!-- /end infogrphics bar -->

The Info Graphic Bar is comprised of four columns, and sectioned with each column commented as such:

The column #...

<!-- infographic column X -->

The graphic type being displayed in the column...

<!-- infographic column X – (info graphic type) -->

The headline for the column...

<!-- infographics column X headline -->

The text body for the column...

<!-- infographics column X text body -->

Portfolio

The portfolio section is contained with the comments below.

<!-- start portfolio -->

<!-- /end start portfolio -->

PORTFOLIO

Project #1
web design

Project #2
application development

Project #3
software development

The Portfolio section is commented with the following sections:

Headline of the Portfolio section...

<!-- portfolio headline -->

Image of the portfolio item...

<!-- portfolio image -->

The name of the portfolio item...

<!-- portfolio item name -->

The portfolio item description or category...

<!-- portfolio description -->

Blog

The blog section is contained within the comments below:

```

Setting your map address

The bizStrap ONE website displays your law practice address with a Google map embedded in your website.

To input your address details open the file **function.js** located in the **js** folder. Locate the map section (shown in the illustration below) within the file (roughly at line 170); and modify the following items:

- **Latitude and Longitude Coordinates of Map's Center Point** - change out the location of the map's center point.
- **Latitude and Longitude Coordinates of Map's Marker Image** - change out the location of the map's marker image.
- **Title for Map's Marker Image**
- **Map's Marker Image**

```

170 map();
171 function map() {
172     google.load('maps', '3', {
173         other_params: 'sensor=false'
174     });
175     google.setOnLoadCallback(map_initialize);
176 }
177
178 function map_initialize() {
179     var myLatLngCenter = new google.maps.LatLng(32.83823, -96.775347);
180     var myMarker = new google.maps.LatLng(32.83823, -96.775347);
181
182
183     var mapEl = document.getElementById('map');
184     if(mapEl) {
185         map = new google.maps.Map( mapEl, {
186             zoom: 14,
187             scrollwheel: false,
188             center: myLatLngCenter,
189             disableDefaultUI: true,
190             mapTypeId: google.maps.MapTypeId.ROADMAP
191         });
192         var marker1 = new google.maps.Marker({
193             position: myMarker,
194             map: map,
195             title: "5321 E Mockingbird Ln, Dallas, TX 75206",
196             icon: '../static/img/map_marker.png'
197         });
198         google.maps.event.addDomListener(window, 'resize', function() {

Changing Color and Layout Options

The bizStrap ONE template allows you to quickly and easily change the base theme color to suit your organization's brand preferences. Included within the default theme view is a Style Switcher panel that allows you to see what your site will look like when the base color and layout style options are changed.

To adjust templates settings simply edit `/js/style-switcher/style-switcher.js` - at the beginning of the file you will see all the config settings, which should be self-explanatory. The Style Switcher Panel can be turned off there as well using the following switches:

- **Style Switcher enabled:** `enable_style_switcher = true;`
- **Style Switcher disabled:** `enable_style_switcher = false;`

Slider Revolution Documentation

Turn simple HTML markup into a responsive (mobile friendly) or full width slider with must-see-effects and meanwhile keep or build your SEO optimization (all content always readable for search engines). See the heaps of custom transitions/animations for each object on the page! Customize this slider with just a little HTML and CSS to your very needs.

This plugin features tons of unique transition effects, an image preloader, video embedding, autoplay that stops on user interaction and lots of easy to set options to create your own effects. All customization can be handled via jQuery Options, HTML 5 data-attributes and CSS !

The developer site for Slider Revolution can be found here:

http://codecanyon.net/item/slider-revolution-responsive-jquery-plugin/2580848?sso?WT.ac=search_item&WT.seg_1=search_item&WT.z_author=themepunch

Also, you can find other slide examples/variations using Slider Revolution here:

<http://www.youtube.com/watch?v=J9FroPmOLT0>

Slider Revolution Markup (documentation from the developer)

The items markup uses javascript/jQuery to transform a block of HTML markup into the slider, all customization is done through the use of HTML5 data attributes and CSS. The markup is valid for HTML5 rules and the content will be fully indexed by search engines. The general structure of markup follows this schema:

Two surrounding DIVs are the basic holder for your Slider:

```
<div id="banner_container">
  <div id="banner" >...</div>
</div>
```

An unordered list inside holds the different slides as list elements

```
<ul>
```

```
<!-- THE BOXSLIDE EFFECT EXAMPLES WITH LINK ON THE MAIN SLIDE EXAMPLE -->
```

```
<li data-transition="boxslide" data-slotamount="7" data-link="http://www.google.de">
  
  <div class="caption sft big_white" data-x="400" data-y="100" data-speed="700" data-start="1700"
data-easing="easeOutBack">KICKSTART YOUR WEBSITE</div>
  <div class="caption sfb big_orange" data-x="400" data-y="142" data-speed="500" data-
start="1900" data-easing="easeOutBack">WITH SLIDER REVOLUTION!</div>
  <div class="caption lfr medium_grey" data-x="510" data-y="210" data-speed="300" data-
start="2000">UNLIMITED TRANSITIONS</div>
</li>
...
</ul>
```

Next, we describe the inner of this list elements.

The more advanced users will have no problems in customizing the slider up to every detail and create their own sliders using the CSS files.

The CSS file responsible for the layout of your slider is the settings.css. Find All Responsive Settings and Docu later in "Responsive Captions".

Layout

The Default parameters of the Plugin

- **delay** The time one slide stays on the screen in Milliseconds (Default: 9000)
- **startheight** Basic Height of the Slider in the desktop resolution in pixel, other screen sizes will be calculated from this (Default: 490) It should be similar to the settings of the style sheet. If you use a full width banner, it will define the max. Height of the banner by resizing of the browser. The banner won't be higher than this value.
- **startwidth** Basic Width of the Slider in the desktop resolution in pixel, other screen sizes will be calculated from this (Default: 890) It should be similar to the settings of the style sheet. If you use a full width banner, it will define the max. Width of the banner by resizing of the browser.
- **hideThumbs** Time after that the Thumbs will be hidden(Default: 200),
- **navigationType** Display type of the navigation bar (Default:"none")
Options:
bullet
thumb ** In full width version thumbs won't be displayed if navigation offset set to show thumbs outside of the container ! Thumbs must be shown in the container!
none
both
- **navigationArrows** Display position of the Navigation Arrows (Default: "nexttbullets")
Options:
nexttbullets
verticalcentered ** By navigation Type Thumb arrows always centered or none visible
none
- **navigationStyle** Look of the navigation bullets (Default: "round")
Options:
round
square
navbar ** If you choose navbar, we recommend to choose Navigation Arrows to nexttbullets
- **touchenabled** Enable Swipe Function on touch devices (Default: "on")
Options:
on
off

- **navOffsetHorizontal** The Bar is centered but could be moved this pixel count left(e.g. -10) or right (Default: 0) ** By resizing the banner, it will be always centered !!
- **navOffsetVertical** The Bar is bound to the bottom but could be moved this pixel count up (e.g. -20) or down (Default: 20)
- **shadow** The Shadow display underneath the banner
Options:
0 No Shadow
1
2
3
- **onHoverStop** Stop the Timer when hovering the slider
Options:
on
off
- **thumbWidth** the basic Width of one Thumbnail (only if thumb is selected. Default:100)
- **thumbHeight** the basic Height of one Thumbnail (only if thumb is selected Default 50)
- **thumbAmount** the amount of the Thumbs visible same time (only if thumb is selected)
** All Thumbs will be hidden in smallest Responsive Level, and in smaller level default size is reseted to 60x30px. Can be modiflicated in the settings.css file)
- **fullWidth** on/off It turns on the Horizontal Centering of Images in FullWidth version. In Case the Image is bigger then the container width, it fits the image with its height in the container and centers horizontally.
- **stopAtSlide** -1 or 1 to 999. Stop at selected Slide Number. If set to -1 it will loop without stopping. Only available if stopAfterLoops is not equal -1 !
- **stopAfterLoops** -1 or 0 to 999. Stop at selected Slide Number (stopAtSlide) after slide looped "x" time, where x this Number. If set to -1 it will loop without stopping. Only available if stopAtSlide not equal -1 !

02 Slider items

**** - Every list item represents a new banner/slider item.
Transition effects and a possible slide link are defined here:

- **data-transition** The appearance transition of this slide
Options:
boxslide
boxfade

slotzoom-horizontal
slotslide-horizontal
slotfade-horizontal
slotzoom-vertical
slotslide-vertical
slotfade-vertical
curtain-1
curtain-2
curtain-3
slideleft
slideright
slideup
slidedown
fade
random
slidehorizontal
slidevertical

- **data-masterspeed** Set the Speed of the Slide Transition. Default 300, min:100 max:2000.
- **data-slotamount** The number of slots or boxes the slide is divided into. If you use boxfade, over 7 slots can be juggy.
- **data-link** A link on the whole slide pic
- **data-delay** A new Delay value for the Slide. If no delay defined per slide, the delay defined via Options will be used
- **data-thumb** An Alternative Source for thumbs. If not defined a copy of the background image will be used in resized form

Each List item must include:

- an image as Background Image / Main Image with Data of the thumb
OR
- a colored background image AND a coloredbg caption which is full width/height defined !!
-
- <div class="caption coloredbg fade" data-x="0" data-y="0" data-speed="10" data-start="0" style="background-color:#ff9118; width:100%;height:100%"></div>

Each List item can include:

- some <div>s containing captions (class="caption"), this could contain embedded video iframes also

```
<li data-transition="boxslide" data-slotamount="7" data-link="http://www.google.de">
  
  <div class="caption sft big_white" data-x="400" data-y="100" data-speed="700" data-start="1700"
data-easing="easeOutBack">KICKSTART YOUR WEBSITE</div>
  <div class="caption sfb big_orange" data-x="400" data-y="142" data-speed="500" data-
start="1900" data-easing="easeOutBack">WITH SLIDER REVOLUTION!</div>
  <div class="caption lfr medium_grey" data-x="510" data-y="210" data-speed="300" data-
start="2000">UNLIMITED TRANSITIONS</div>
</li>
```

Captions

Captions are Containers which can be customized via CSS, classes for the start animation and some data options.

The CSS for the caption added in the settings.css file because it depends strongly on the responsive Sizing.

There are 4 Steps of Responsive Contents which are written later below under the Responsive Dependencies Caption.

You find an example in the settings.css of our item download.

The options are in detail:

- color **class** example big_white, big_orange, medium_grey (check the style.css of the example for details)
- animation **class**
Options:
sft - Short from Top
sfb - Short from Bottom
sfr - Short from Right
sfl - Short from Left
lft - Long from Top
lfb - Long from Bottom
lfr - Long from Right
lfl - Long from Left
fade - fading

- **data-x** The horizontal position in the standard (via startwidth option defined) screen size (other screen sizes will be calculated)
- **data-y** vertical position in the standard (via startheight option defined) screen size (other screen sizes will be calculated)
- **data-speed** duration of the animation in milliseconds
- **data-start after** how many milliseconds should this caption start to show
- **data-easing** special easing effect of the animation

Options:

Videos

In order to embed videos in the slider you can embed videos via iframe of your favorite video site that allows this kind of embedding. An example with Vimeo:

```
<li data-transition="slideup" data-slotamount="20">

    <div class="caption lfb boxshadow" data-x="70" data-y="120" data-speed="900"
data-start="500" data-easing="easeOutBack"><iframe
src="http://player.vimeo.com/video/29298709?title=0&byline=0&portrait=0" width="460"
height="259"></iframe></div>

    <div class="caption lfb medium_grey" data-x="550" data-y="258" data-
speed="300" data-start="1600" data-easing="easeOutExpo">to your Slides</div>

</li>
```

Banner Timer

In order to use a banner timer, you will need to add the markup within the banner or fullwidthbanner divs.

The markup should look like :

```
<div class="tp-bannertimer"></div>
```

To remove this timer just sim
